Hi guys, I feel so stupid asking for this but how can I read from serial port in C? (I already did this using hi-level code as Gambas or Python, but I MUST do this in C).

Gambas Serial Port Send 3/18/2017 0 Comments With Serial over IP Connector any serial port device connected to COM port could be accessed from anywhere over LAN as if it was attached to local PC.. I've read/tested several pieces of C code found online about reading from serial port without timeout:Result is:received 20 bytesreceived 83 bytesreceived 12 bytes.. ' I've already send you the serial port source code found in a gambas-example try to run that code.. I'm using Arduino board sending me from 400 up to 2014 bytes at once I use RTS/CTS signals as GPIO for handshaking.
